

The **COLLEGE PLACEMENT Web Application** is an easy-to-use platform that simplifies the placement and career development process for colleges, students, and recruiters. The platform organizes and manages the placement process using three main modules: **Admin**, **Tutor**, and **Student**.

Admin Module:

The admin must be able to carry out job tasks efficiently. The admin must have access to the student list classes. The admin must be able to create and post job listings. The admin must have permission to review and approve tutors. The admin must be able to download files in Excel format.

Tutor Module:

The tutor should be able to see the list of students. The tutor should verify the supplies. The tutor should be able to see which jobs the students have applied for. The tutor should know which jobs are available.

Student Module:

Students should have access to a list of jobs related to their courses. Students should apply for relevant jobs. Students' job applications should be submitted and tracked. Students should attend training sessions.
